### **Product Introduction**

S30 is an easy-to-operate and feature-rich device that specially developed for LED displays. It supports high-definition multi-type interface input, integrates professional display control technology and powerful video processing capabilities, and it simplifies the scene environment to build a video processor. Using high-performance image processing chip; with advanced interlaced image adaptive processing technology and ultra-clear noise reduction engine, eliminating video image motion smearing and jagged phenomenon, the video image enhancement technology makes the image clearer and more detailed, rich in details, and full of colors , Image quality is stable.

#### **Product Features**

- It has 2 channels of gigabit network port output to directly connect to the receiving card, simplifying the on-site environment construction.
- 2. It is not necessary to debug the display screen through a computer, and the display screen can be simply debugged using S30.
- 3. The USB ports on the front and rear panels support USB playback, plug and play.
- 4. The input channel can be switched seamlessly.

#### **Application Scenarios**

It is suitable for many application scenarios such as small and medium-sized LED displays in shopping malls, hotels, exhibitions, TV studios, etc.

### **Functions**

- 1. It supports USB play, the video and picture could be played together.
- 2. It supports 3 zoom modes: Full Screen Zoom, Point-to-Point Display and Custom Zoom.
- 3. It supports seamless switching or fade-in and fade-out between multiple signal input channels to enhance and present professional-quality presentation pictures.
- 4. It supports the quick screen connection, with very simple operation, the screen configuration could be completed.
- 5. The intuitive LCD display interface on the front panel and clear button light prompts simplify the control operation of the system.
- 6. It support to create 8 user scenes as templates, save them and call them directly, which is convenient to use.
- It supports 2 Ethernet Port Outputs, the maximum loading capacity could reach up to 1.3 million pixels.
- it supports to adjust the positions and sizes of the window and also the window capture function is supported.
- 9. it supports external independent audio input and output.
- 10. The output resolution could be user defined( custom the resolution)
- 11. The Input EDID could be user defined (customized)
- 12. It supports the synchronous switching of the video and audio.
- 13. It supports the switching of the partial or Full Screen.
- 14. It supports to have just one-click to get the black screen.
